

International address auto-fill and validation for Salesforce CRM

Your sales team may be great at generating and following up on leads. But if your client's address and business data isn't managed correctly, all that good work could be for nothing.

Postcode Anywhere for Salesforce CRM is the only tool on the AppExchange that lets you auto-fill and validate international address and business data directly within Salesforce CRM.

Combining worldwide address management with worldwide business data, our comprehensive two-in-one package integrates with any address object or web2lead form so you can empower your business in minutes.

Key Features

- Enter address data five times faster than conventional methods.
- Ensure data accuracy as it's captured.
- Choose the address data you need, across the UK, North and South America, Europe, Australasia and parts of Asia.
- Access business data from the global 141-million-record D&B database.
- Be up and running in a few clicks!

Pricing

- **US and international pricing:**
starts from \$60/user/year + credit packs.
200 free credits available.
- **UK pricing:**
Starts from £140/user/year for UK street level data.
30 day free trial available.
- There are no setup costs and technical support is provided for free. For a full list of available credit packs, visit:
www.postcodeanywhere.com/appexchange

Take three minutes to view the flash demonstration, where you can see our App in action.

The screenshot shows the 'Account Edit' page in Salesforce CRM. It is divided into several sections:

- Account Information:** Fields include Account Owner (Demo), Account Name, Parent Account, Account Number, Account Site, Type (dropdown: --None--), Industry (dropdown: --None--), Annual Revenue, DUNS Number, and Ultimate DUNS.
- Address Information:** Fields include Billing Country (United States of America), Billing Zip/Postal Code (94105), Billing Street (1 mar), Billing City (Market), and Billing State/Province (San Francisco, CA).
- Additional Information:** Fields include Customer Priority (Market Plz), SLA Expiration Date (Market St), and Number of Locations (San Francisco, CA).
- Description Information:** A field for Description with a value of '3 item(s)' and a 'PostcodeAnywhere' tag.

Postcode Anywhere has provided a simple, efficient and cost effective solution to the complex challenge of managing a colossal global CRM system.

Honeywell

As a not-for-profit user, this App has had a great impact on our activities. It saves time and it saves money. Our user base did nothing but smile all week when we gave them access to the service.
